MARINETTE MARINE

This year marks the 16 year anniversary of the North Coast Marine Manufacturing Alliance. In August 2009, the marine manufacturing companies in northeast Wisconsin met with Northeast Wisconsin Technical College to discuss the industry's skill set needs. The companies and higher education realized that there was more to be done than just curriculum development. The marine manufacturing industry had an image problem both locally and nationally. In addition, the region was not recognized nationally as being the best place in the country to buy a ship/yacht/boat. Only by having the marine manufacturers work together in sharing their message, along with education could they change this image. In September 2010, Fincantieri Ace Marine, Fincantieri Bay Shipbuilding, Burger Boat, Cruiser Yachts, Fincantieri Marinette Marine, Marquis Yachts, and Palmer Johnson joined together with regional colleges and formed an industry sector partnership called, "North Coast Marine Manufacturing Alliance."

The reason the organization decided to incorporate the name "North Coast" is due to the Great Lakes has 10,900 miles of coastline. In addition, the book, "Caught in the Middle" by Richard Longworth stated, "When one compares the rich resources of the Great Lakes with that of the East Coast, West Coast or Gulf Coast, does the name of the "North Coast" more accurately communicate the region's real potential?

Highlights of the organization over the past 16 years:

- Tall Ships Festival in 2013, 2016 and 2019
- SeaPerch underwater robotics competition from 2015- 2025
- Marine Construction technical degree & Marine Engineering Associate Degree
- Teacher & student outreach events
- NWTC's North Coast Marine Manufacturing Training Center in Marinette
- Associate Member Expo (connecting marine builders with potential suppliers)
- Partnerships with the Door County & Wisconsin Maritime Museums
- Partnership with Hands on Deck
- Partnerships between the Einstein Project & Navy League focused on the SeaPerch competition and student boat builds.

AGILEX **EPAYABLES PROGRAM**

A great opportunity to enhance your company's security and financial resources.

ASK YOURSELF...

1) How have you adapted to the everchanging security risk for your business?

2) Currently, do you use any fraud prevention tactics in your payment process?

3) Are you maximizing your potential financial benefits on your vendor payments?

For more information:

SAVE SPACE & MAXIMIZE EFFICIENCY WITH UNIQUE MATERIAL HANDLING & AUTOMATION SOLUTIONS

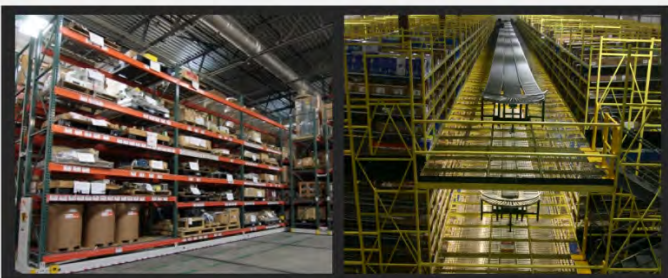

PUSHBACK RACK

Pushback rack stores pallets on wheeled carts and operates using the force of gravity, allowing for quick loading/unloading and greater efficiency.

CREATIVE RACK SOLUTIONS

From creative racking solutions like ActivRac to a multi-level pick system, Axiom can provide the right application to meet your unique needs.

CONVEYOR SYSTEMS

Whether you need individual conveyor segments or entire turnkey conveyor systems, we work with you in designing a solution for your needs.

*When designing your facility, know that options are endless. Our team at Axiom provides design-build services for racking and warehouse applications, in addition to repair and maintenance. **Let's talk racking!***
